ACIT 4850 – Enterprise System Integration – Winter 2024

Lesson 9 – Continuous Delivery

For Lesson 9 we will be starting to deploy the sample applications from your CI pipelines. So we will be adding Continuous Delivery (CD) to our pipelines. Please read the following on Continuous Delivery for the Lesson 9 class:

- https://continuousdelivery.com/, including:
    o Introduction
    o Principles
    o Foundations
    o Implementing Continuous Delivery

We will be using Docker for the Continuous Delivery stages of our pipelines, both building and deploying Docker images. If you wish, please review the following on Docker:

- Docker Overview: https://docs.docker.com/engine/docker-overview/
- Docker Compose Overview: https://docs.docker.com/compose/
